

Nagizaaz Shaik

AI / LLM Engineer · ML Systems · Cloud Architect

nagizaazs@gmail.com | +1 (256) 251-4502 | Dayton, OH 45419 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI / LLM Engineer with 5+ years across applied ML, data engineering, and cloud architecture in financial services. Specialize in production LLM and multi-agent systems, ML model deployment, and secure, audit-compliant AWS ML platforms. AWS Machine Learning – Specialty certified.

TECHNICAL SKILLS

LLM & Agentic AI: RAG (Hybrid Search · Reranking · HyDE · Corrective RAG) · Multi-Agent Orchestration (LangGraph · CrewAI) · Model Context Protocol (MCP) · Prompt Engineering & Versioning · Semantic Caching · LLM Gateways · OWASP LLM Top 10 · Red-Teaming

LLMOps & Eval: RAGAS · LLM-as-Judge · A/B Testing · Cost Analytics · Agent Observability · MLflow · NVIDIA NIM · vLLM / Ollama

ML & AI: PyTorch · Transformers (from-scratch) · XGBoost · BERT · HuggingFace · scikit-learn · SHAP · AWS SageMaker (Pipelines · Model Monitor)

Cloud & Infra: AWS (SageMaker · EC2 · S3 · RDS · Glue · Redshift · EKS · IAM · CloudWatch · CloudTrail) · GCP (BigQuery · Vertex AI) · Terraform

MLOps: Apache Airflow · MLflow Registry · SageMaker Pipelines · Docker · Kubernetes · ArgoCD · CI/CD · Automated Retraining · FastAPI

Data Governance & Security: NCUA / SOC 2-aware · ECOA / Fair-Lending testing · PII handling (Presidio) · AES-256 (rest/transit) · IAM least-privilege · CloudTrail audit logging · model cards & audit trails · OPA/Conftest · Checkov · GitLeaks · SLSA

Data Engineering: Kafka · Spark / PySpark · dbt · AWS Glue · Redshift · Snowflake · Oracle SQL / PL-SQL

Languages: Python · SQL · PL/SQL · Bash

PROFESSIONAL EXPERIENCE

Cloud Architect at **Wright-Patt Credit Union** · Fairborn, OH · [Contract](#)

Jul 2025 – Jun 2026

- Designed the credit union's AWS ML platform end to end — SageMaker inference endpoints, MLflow model registry with version-gated promotion and automated rollback, and per-environment VPC isolation — reducing deployment failures 85% within 60 days.
- Defined the data-security architecture for all ML workloads — AES-256 at rest and in transit, CloudTrail on every inference call, IAM scoped to least privilege — and passed two consecutive NCUA audits with zero findings on \$400M in member financial data.
- Codified infrastructure in Terraform and moved deployments to a GitOps workflow (ArgoCD), giving reproducible, peer-reviewed environment changes and faster, safer releases.
- Introduced an internal LLM gateway with evaluation guardrails so application teams could adopt generative-AI features against approved models with cost controls and audit logging — laying the platform foundation for the AI roadmap.
- Mentored two engineers into ML and platform ownership through weekly architecture and code-review sessions; both now ship production components independently.

ML Engineer at **Day Air Credit Union** · Kettering, OH · [Contract](#)

Jul 2024 – Jun 2025

- Built and deployed an XGBoost credit-risk model on AWS SageMaker scoring 500+ consumer-loan applications per day — automated first-pass underwriting and cut manual analyst review 30% while holding approval-rate stability within risk thresholds.
- Fine-tuned a BERT classifier on member support tickets and shipped it as a FastAPI microservice — 14 intent categories, sub-200ms p99, routing 10,000+ weekly requests with a 40% drop in misrouting.
- Engineered an automated retraining pipeline in Apache Airflow — rolling-window retrain, holdout evaluation, and promotion only when AUC, precision, and calibration cleared defined gates — replacing 8+ hours of manual work per week.
- Stood up model monitoring with SageMaker Model Monitor and custom statistical baselines across live models, catching two drift events before they affected production credit decisions.
- Built a RAG document-QA assistant over 500+ internal policy and NCUA regulatory documents (LangChain + vector search, Claude 3.5), cutting compliance research time from 2 hours to under 20 minutes per query.

Senior Data Engineer at **Cognizant** · Hyderabad, India · [Full-time](#)

Jul 2020 – Jun 2023

- Led an Oracle 11g to Amazon Redshift migration for a financial-services client — redesigned the schema for columnar storage with tuned distribution and sort keys and re-platformed 20+ stored procedures as modular Airflow DAGs; cut average analytical query runtime 60% across a 25 GB+ warehouse serving five business units.
- Designed 15 production ETL/ELT pipelines in Apache Airflow across Oracle, SQL Server, flat files, and REST APIs, with a multi-stage validation layer (row-count reconciliation, null-rate checks) at every hop — surfaced a silent upstream corruption that had been invalidating three months of downstream financial reports.
- Built a real-time Kafka feature pipeline — POS events aggregated in five-minute tumbling windows and landed to Redshift at sub-60-second end-to-end latency, contributing to a 28% reduction in emergency restocking.
- Promoted from Associate to Senior Data Engineer within two years — code reviews for three engineers, weekly data-modelling sessions, and primary client contact across two accounts with 100% on-time delivery.

SQL / Data Intern at **Uber** · Hyderabad, India · [Internship](#)

Aug 2019 – Oct 2019

- Returned to the Hyderabad city-ops team — built SQL queries and Vertica views powering weekly driver-utilisation, trip-completion, and surge-pricing reporting.
- Standardised fragmented ad-hoc queries into reusable templates, cutting analyst prep time for the weekly ops review from 3 hours to under 45 minutes.

Python Intern at **Uber** · Hyderabad, India · [Internship](#)

Jan 2019 – Mar 2019

- Automated extraction and transformation of operational event data with Python and pandas — turned a 4-hour manual weekly process into a scheduled job producing clean summary tables for city ops.
- Built an anomaly-detection script flagging unusual trip counts and revenue against rolling 7-day baselines before data entered the reporting pipeline; earned a return internship offer.

PROJECTS

LLM Gateway [LLM INFRASTRUCTURE](#)

github.com/shaikh6/llm-gateway

Production LLM gateway with an OpenAI-compatible API — semantic caching, latency-aware routing across Claude / OpenAI / Ollama, token-budget enforcement, and per-key cost analytics behind a single FastAPI interface with Prometheus metrics.

FastAPI · Claude · OpenAI · Ollama · Redis · Prometheus · Docker

Finance Agent Crew [AGENTIC AI · FINTECH](#) github.com/shaikh6/finance-agent-crew

Multi-agent financial research system — parallel analyst, risk-assessor, and report-writer agents collaborate over SEC filings, earnings calls, and news to produce structured investment briefs with citation chains, orchestrated in LangGraph with n8n automation.

LangGraph · Claude · SEC EDGAR API · FAISS · n8n · FastAPI

nano-finbert [ML · FINTECH](#) github.com/shaikh6/nano-finbert

A tiny transformer encoder (~2M params) trained from scratch on financial text — no pretrained weights, no HuggingFace dependency. Feed it a financial headline, get back a structured market signal: sentiment, entities, sectors, event type, and impact score.

PyTorch · Transformers · NLP · From-Scratch · Fintech

LLM Safety Auditor [AI SAFETY](#) github.com/shaikh6/llm-safety-auditor

Automated red-teaming framework for production LLMs — 250+ adversarial attack vectors across six mutation strategies (jailbreak, indirect prompt injection, encoding obfuscation, multi-turn escalation). Scores against the full OWASP LLM Top 10 and generates compliance-grade PDF audit reports.

Python · HuggingFace · OWASP LLM Top 10 · Red-Teaming · FastAPI · ReportLab

CERTIFICATIONS

AWS Certified Machine Learning – Specialty · Amazon Web Services

AWS Certified Cloud Practitioner · Amazon Web Services

GCP Professional Data Engineer · Google Cloud

Snowflake SnowPro Advanced: Data Engineer · Snowflake

dbt Analytics Engineering Certification · dbt Labs

EDUCATION

Master of Science, Computer Science · GPA 3.93 / 4.0 — University of Dayton, Dayton, OH Aug 2023 – May 2025
Coursework: Advanced Machine Learning · NLP · Human-AI Interaction · Big Data Systems · Cloud Computing · Distributed Systems · Statistical Inference

Bachelor of Technology, Computer Science Engineering · GPA 8.9 / 10 — CMR Engineering College, Hyderabad, India Aug 2016 – May 2020
Coursework: Data Structures & Algorithms · DBMS · OOP (Java) · Computer Networks · Operating Systems · Software Engineering · Design & Analysis of Algorithms
